How serious is neglect?

The answer to this is simple – **very serious**.

Take time to look at these brain scans from two 3-year-olds with your social worker.

Can you identify which one is the brain of a child who has experienced neglect?

The scan on the left is an image from a healthy three-year-old with an average head size

The image on the right is from a three-year-old child suffering from severe sensory-deprivation neglect.
